Office of Policy and Planning, IC Staff

STAT

FROM

: [REDACTED]

Special Assistant-NIO Support

SUBJECT

: Intelligence Definitions

Attached, please find a proposed redraft of the definition our working group considered on Energy Intelligence. The redraft is intended to make the definition more literate and to eliminate technologies and certain other terms from the definition because those terms make the definition too broad in scope. You will recall that I reserved when our group considered this definition until I could acquire expert advice; the attached definition reflects that advice.

Attachment:
As stated

[REDACTED]

MORI/CDF

Energy Intelligence

Foreign intelligence on the economic, political and technical factors affecting energy supply in international markets and in individual foreign countries. Key intelligence includes data on energy supply/demand balances, prices, national and international energy policies, and the political and institutional forces influencing policy decisions in these areas.
